

PRESS RELEASE

MORE SHOCKING FAULTS

Middlesex, December 2004 – Not for nothing does the National Association of Estate Agents recommend pre-let and annual electrical checks. With more than 80 Safety Inspectors out in the field, hazardous electrical faults are a daily *gas-elec* occurrence.

Homes can be dangerous places!

Here are just three of our latest 'shocking faults':

Engineer David Ribano got an electric shock when he was testing a fridge; the flex had been eaten by a rodent!

Another from David – he found a fused spur feeding an immersion heater; the front had melted, exposing live conductive parts.

A faulty fridge – again – condemned by one of our Northern Ireland engineers. He also found a 'live' socket with broken insulation.

ENDS/...

Editor's Notes

Founded in 1996, **gas-elec** carries out impartial safety inspections and light remedial works. Its unique inspection service provides the residential lettings market with multiple inspections of the gas and electrics in just one visit. **gas-elec** has over 126 franchisees operating from 18 regional offices, who this year will carry out more than 120,000 safety inspections in domestic properties throughout the UK. For more information visit www.gas-elec.co.uk.
