

PRESS RELEASE

REDUCING GAS BILLS TO ALMOST ZERO?

Middlesex, 20 January 2009 – Fuel saving measures are well documented – the loft insulation, the double glazing and so on. But the fact remains, if we want to pay less for our gas, we've got to *use* less. gas-elec's new g-save is reducing gas bills by doing just that.

With average gas prices currently running at about £660 for a two-bed bungalow and £765 for a three-bed semi (*Source: www.whatprice.co.uk*) our new g-save fuel economiser is saving users around £200 a year on their fuel bills. Coupled with this year's government winter fuel payment to seniors (£250-£400) the additional savings provided by the g-save could lift many older people out of fuel poverty by cutting their actual expenditure on gas to almost zero.

The g-save (out in the market since the beginning of October 2008) is featured as Good Housekeeping magazine's tried-and-tested Innovation of the Month in its February 2009 issue.

In fact, the g-save has so far come up with a range of savings in a variety of homes (calculated on actual meter readings with, and without, the g-save). These have ranged from 22% in a two-bedroom terraced cottage to 34% in a 4- bedroom detached house.

And now – a new measure – the g-save can be supplied and paid for over 12 months, allowing most people to fund its cost from the monthly savings they make on their fuel bills over the coming year.

ENDS/...

Editor's Notes

Founded in 1996, **gas-elec** carries out impartial safety inspections and light remedial works. Its unique inspection service provides the residential lettings market with multiple inspections of the gas and electrics in just one visit. **gas-elec** has over 126 franchisees operating from 18 regional offices, who this year will carry out more than 120,000 safety inspections in domestic properties throughout the UK. For more information visit www.gas-elec.co.uk.
