## ENERGY COMPARISON WEBSITE MADE EASY

### gas-elec offers consumers more energy saving options

**Middlesex, 4 June 2009** – gas-elec, a leader in the field of gas and electrical safety inspections, services, products and advice, has launched a consumer comparison website that offers users the widest range of energy suppliers in order to compare their gas and electricity prices.

gas-elec Compare enables consumers to find the best possible deal for their gas and electricity and in line with the recent rise in fuel costs, the website is set to provide consumers significant savings on their annual fuel bill.

John Davidson, Managing Director of gas-elec: “With gas and electricity prices at record highs, finding the cheapest gas and electricity prices can be a tricky and time consuming process. gas-elec Compare is a quick and easy solution to this.”

Changing gas supplier or switching electricity provider couldn't be easier. Enter the property's postcode into the standard form along with information on the current fuel supplier to compare electricity and/or gas prices in the UK.

gas-elec Compare has been set up to take into consideration the current energy consumption to provide a list of the best deals using the advanced search system. The system contains an accurate database of prices from the various UK utility companies and also gives reviews on all energy companies, helping to make the switch or change to a different gas or electricity supplier a total success.

“The user-friendly search tool means that you can easily find the cheapest gas and electricity deals. The system then offers users the opportunities to switch supplier(s) painlessly, in your own time and without pressure from a salesperson,” adds Davidson.

gas-*elec* Compare compares gas and electricity tariffs from all major suppliers, helping consumers save money and make the right choice on their home energy supplier.

A further benefit for users who have switched using gas-*elec* Compare, is that they will also receive email alerts informing them of cheaper options when they become available.

Visit the website at [www.gas-elec.co.uk/compare-energy-prices](http://www.gas-elec.co.uk/compare-energy-prices).
