FREE G-SAVE TRAINING

Tuesday, 27 October 2009

Middlesex, 15 October 2009 – gas-elec is offering engineers the opportunity to attend a free g-save training session at their training centre in West Drayton, Middlesex.

“The g-save smart boiler economiser, which we launched earlier this year, has received an overwhelming response from consumers looking to find effective ways to cut their heating bills. In order to keep up with the growing demand, we have decided to offer a two-hour installation course for engineers,” says John Davidson, managing director of gas-elec.

The course gives an overview of the product, together with the expected savings it can generate, followed by a practical demonstration on gas, oil or LPG-fuelled systems.

The g-save is a tried-and-tested, patented product that uses 'smart' technology to optimise the operation of the central heating boiler, improving efficiency to greatly reduce gas consumption and lower heating bills by up to 31%.

The next course will be taking place at 11:00 on Tuesday, 27 October 2009. To book your place, call 0800 587 0666 or email g-save@gas-elec.co.uk.
